- Collect all claim related data
- Coordinate with Owners and Claims processor in USA
- Handle all the reports of team
- Daily Co-ordination with team members for daily progress & reports.

## Academic Project

---

**Project Title: Regenerative Braking System**

**Project Role:** Model Design and Drafting.

**Description:** Regenerative braking System is an advanced and supplementary braking system that is used along with the conventional braking system in modern electric and hybrid vehicles. The conventional braking causes friction between brake pad and brake disc. It converts vehicles kinetic energy into heat which goes waste. However, regenerative system recovers some of the waste energy and puts it to work again.
